## TO MAKE UP FIVE CLASSES

Of the 9,000,000 Registrants as Yet Uncalled to Be Taken in Rotation.

### METHOD IS SIMPLIFIED

Each Man Will Know Just When He Will Have to Reply to Next Call.

A new system for the creation of additional armies made up from the draft forces of the United States has been worked out by Provost Marshal Gen. Crowder, by which the labors of the local and district boards will be greatly lessened. The registrants will be divided into five classes, in the order of their eligibility for military service. Each man will know his exact position and no man whose work is deemed necessary at home to support his family will be taken.

"To do this it has been determined to obtain from each man complete information of a character which will definitely fix his economic worth as compared with his fellow registrant, and from the information thus obtained, to place him in one of five classes, each to be called in turn as the need arises.

"The method of obtaining this information is through a 'questionnaire,' a series of questions calculated to produce the information required. This document will be mailed to every registrant not in service on a day to be fixed, seven days being given to each registrant to complete and return the same. Every opportunity will be offered to each man to complete his questionnaire fully and without error.

"The local boards will then examine each questionnaire and assign each registrant to one of five classes.

"These classes will be based upon every conceivable condition, from the family or occupational standpoint, that should properly be advanced by a man desiring to be excused from military duty. Class 1 will be the first called for physical examination and service, and when it is exhausted if the nation's needs are such as to make it necessary, Class 2 will follow, and thus each man registered will ultimately take his place if needed.

"Every opportunity for appeal from such classification by the local board has been retained and perfected, but proceedings have been greatly simplified.

"The tedious work of the local boards has been practically eliminated by the production of a form to be known as No. 1000, which will be the foundation stone of the new system.

## CHANGE IN MOON SOUND

Russian Fleet Escapes Northward, Possibly Attempt to Reach Reval Fort.

### ABANDON FIVE WARSHIPS

British Vessels Bombard Ostend, Which Is Used as Submarine Case.

The Russian Riga fleet has escaped northward from Moon sound, through the tortuous channels and maze islands lying between them and the Gulf of Finland, where it took refuge last week.

The announcement of the sailing of the flotilla is contained in the latest German communication, which says the Russians left behind them the wreck of the battleship Slava, which was sunk in last Wednesday's battle and four additional vessels that have run aground since the naval activities in the Gulf of Riga began. If the Russians are endeavoring to make their escape, instead of offering battle, doubtless their destination is Reval, the Russian fortress situated on the Gulf of Finland in northern Esthonia. Meanwhile the Germans have captured in its entirety the Island of Dago, lying at the southwestern entrance to the Gulf of Finland, also the Island of Schildau, situated between Moon Island and Esthonia coast in the Gulf of Finland. Several hundred prisoners were taken on Dago Island to be added to the large number captured during the last week on Oesel Island.

British naval craft have heavily bombarded the port of Ostend, Belgium, which is being used by the Germans as a submarine base. The Berlin official communication says numerous houses in the town were damaged by the shells from the naval guns.

On the fighting front in Belgium, heavy artillery activity on the part of British and French continues, with the Germans answering spiritedly on various sectors.

In Champagne the Germans delivered somewhat heavy infantry attacks against the French west of Mount Cornillet, but were repulsed. There has been brisk fighting between the Italians and Austrians in the Trentino region and along the Julian front on the Austro-Italian theater and between the entente forces and Teutonic allies in Macedonia.

Likewise in East Africa there has been a renewal of intensive fighting between German and British troops in which the Germans were defeated near Nyangaoe, later, however, the Germans returned to the fray and at last accounts a new battle was in progress. Heavy losses had been sustained by both sides when the last reports were sent to London.

## TRAIN HITS AUTO SUNDAY

### Car Demolished and Driver Has a Leg Broken.

An automobile driven by a young man named Ashby, of Madisonville, was struck by an L. & N. freight train at what is known as the Madisonville crossing, one mile south of Crofton, Sunday afternoon about 3 o'clock, and the machine was demolished. Mr. Ashby was thrown from the car and sustained a broken leg and some bad bruises. The owner of the car and three other men of Hopkins county were enroute home from Cincinnati, O., where each had purchased a new car and each one was driving his own machine at the time of the accident. The injured man was taken to the Crofton hotel, where surgical aid was given and he was sent home on the Dixie Flyer Sunday night.
